

ON-MACHINE PROBING SET-UP

Automate OMP Tasks • Custom Controller Macros
Integrate Probing Routines • Enhanced Post Processors

Don't have the time to stop making parts to finalize your OMP set up?

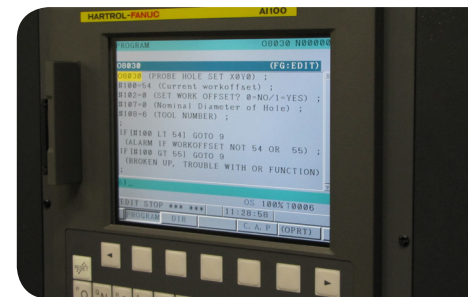

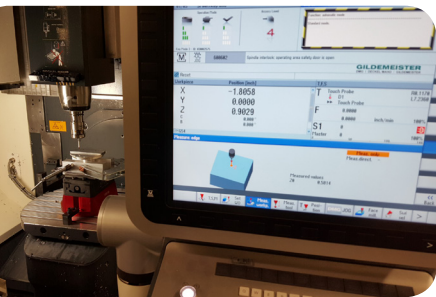

Get your On-Machine Probing going with help from us.

We can help automate OMP tasks through developing custom controller macros for you. We can also integrate probing routines into NX CAM and NX post processors to reduce programming time.

Sherpa Design will create enhanced post processors and custom controller macros to help you get there. Run faster setups and faster first article checks, save time and money and keep ahead of the competition.

What We Can Deliver:

- New post processors
- Offsite programming and spot training
- Automated OMP tasks
- Custom controller macros
- Integrated probing routines
